

Noah A Proctor

Huron, OH, 44839 | (419) 271-5548 | nap2180@columbia.edu | www.linkedin.com/in/noah-a-proctor

EDUCATION

Columbia University, School of Engineering & Applied Science
Bachelor of Science in Operations Research, Minor in Computer Science

Expected Grad: May 2028
Cumulative GPA: 3.63/4.00

Relevant Coursework: Programming in Java, Data Engineering in Python, Probability, Calculus IV, Climate Science
Honors & Awards: Dean's List (3X), Buckeye Cable Scholar of the Year (1%), National Elks Scholarship Semifinalist

WORK EXPERIENCE

Series | New York, NY Dec 2025 – Present
Product Management Intern

- Lead weekly user research sessions (15+ experience interviews) for Generation Z-focused iMessages connection platform, providing insightful user experience (UX) feedback to identify customer needs and enable product pivots
- Define feature specifications and user stories based on synthesis of user interviews, recommending strategic initiatives that align with business value and competitive positioning while managing the end-to-end product lifecycle

Columbia Residential Life | New York, NY Aug 2025 – Present
Resident Advisor

- Supervise and mentor a residential community of 30+ students, fostering an inclusive, supportive living environment; proactively addressed interpersonal conflicts, upheld community standards, and collaborated with campus resources

Run On Climate | Burlington, VT Aug 2025 – Dec 2025
Analytics Intern

- Conducted quantitative research on content interaction and electoral initiatives in the Burlington area, leveraging Python (Pandas, Matplotlib, NumPy) to analyze data sets and identify high-impact promotions for local climate policy agendas
- Managed content strategy across social media platforms, including Instagram, Bluesky, Facebook, and TikTok, applying data-driven performance metrics to optimize engagement and advertisement strategies for endorsed candidate campaigns

Team Ray Technologies | Huron, OH May 2025 – Aug 2025
Analytics & Engineering Intern

- Drove efficiency improvements in electrical panel production, analyzing production processes and collaborating with senior engineers to streamline workflows, raising output by more than 50% within one month of starting the position
- Managed high-volume operations by coordinating design, assembly, and quality assurance of electrical control panels, achieving a consistent throughput of ~5 completed units a week under strict deadlines and setbacks
- Applied data-driven programming and systems testing via programming with Structured Text (Java-like language) to determine and optimize machine operations, ensuring accuracy and reliability to compliance practices for automation

RESEARCH EXPERIENCE

Columbia Economics Department | New York, NY Jan 2026 – Present
Undergraduate Researcher

- Collecting and analyzing Scope 2 emissions data using Python (Matplotlib, NumPy, Pandas) and a London Stock Exchange Group API, studying corporate behavior in the context of differing regulatory and energy environments

Kelly Laboratory | New York, NY Jan 2025 – Mar 2026
Undergraduate Researcher

- Lead research initiative and literature review in multiphase reactive transport in sandstone to support carbon mineralization via the use of imbibition technology, pycnometers, and the potential use of computed tomography scans
- Create MATLAB scripts to interpret imbibition data sets used for characterization with varied boundary conditions

PROGRAMMING PROJECT

Lake Erie Algal Bloom Interpolation | Python (Matplotlib, NumPy, Scikit-learn, Pandas)
<https://github.com/noahproc/lakeeriealgaeml>

- Developed a supervised machine learning model to predict chlorophyll-A concentrations (proxy for algal blooms)
- Visualized spatial sampling stations on the mapped Lake Erie shoreline using GeoPandas and Matplotlib, enhancing the interpretability of environmental patterns and applying predicted severity to the plot

SKILLS

Programming: Fluent in Python, Java; Proficiency in JavaScript, SQL, HTML, CSS; Git, GitHub

Product: Figma (UI/UX Design), Agile, Tableau, A/B Testing, Market Research, Product Life Cycle/Dev, MS Office
